## Collecting

In our new regular column, “Historical Construction Sites”, Wilfried Schreiber writes about his construction site diorama and will introduce kit bashed models. First in line is the P&H TC 670 ...

After exactly five years, Caterpillar 660, the smaller brother of the Caterpillar 666, has been released. The single engine scraper model from CCM is unique in its size. We take a closer look at it ...

## Models

The first model from IMC Models is the Nootboom OSDS lowboy trailer for wheeled construction machines. The tractor truck in the set is a DAF XF Super Space Cab ...

As a complete surprise and without any previous announcement, NZG presented the two Mercedes-Benz Arocs and Actros 8x4 heavy duty transport tractor trucks. We have a look and check how the two models differ in the fine details ...

## Current

Thorge Clever describes the rules governing the marking of over wide loads in his second installment on the correct loading of construction machines ...

In sync with the time of the year and its long nights, Markus Lindner describes how to light dioramas correctly. Working at night is not popular, but in model form it can be a knockout ...
