

Collecting

The excavator models from Steffen Drascher's childhood days have been weathered by time. Today, the collector weathers his new models himself because he likes them only if they have a heavy patina ...

Because the huge volume of new items at the 2014 Nuremberg Toy Show, after the "Bauma Year" of 2013, was really not expected, the article reporting all the new items from the fair is extensive ...

Models

One of the highlights among the new models for this year will be the Bauer cable operated excavator MC 96 from Bymo. We had a pre-production sample given to us ...

Other countries other customs! This is made especially clear by the new model of the Terex AT20-3 from Conrad. These small "Pick & Carry" cranes can be found on almost every construction site in Australia ...

Current

With the noodle maker Barilla considering producing its products with 3D printers, this technology has definitely "arrived". But what is in it for the model builder ...?

Articulated dump trucks with a variety of attachments are used on earth moving tasks because they have all terrain capabilities. Our remodeling specialist Urs Peyer gave the Volvo A25D a new frame for its roll-off bin version ...
