Collecting

The stairwell is the place where Manfred Bauer has placed a special display case. It reaches from the basement to the attic and contains many exquisite models ...

The forty year old model of the Volvo BM wheeled loader by NZG is still impressive today. Albert Schmid introduces the model and shares some background information about the prototype ...

Models

At the Bauma exposition, the maker Conrad has already launched the second mobile crane model. It is the Liebherr MK 88 and our crane specialist Carsten Bengs has assembled the model ...

It took two and a half years of waiting for the appearance of the Caterpillar 245 model. Both versions have now been delivered, and we took a close look at them ...

Current events

We introduce the Caterpillar 245 prototype. Urs Peyer chronicles the development and changes during production over the last twenty years ...

The Swiss holiday canton Wallis is home to this beautiful Weserhütte SW 190 drag line excavator. It is still used regularly to drag gravel from the Rhone River. Our report shows the best side of this machine ...
