Collecting

Thomas Wilk took a close-up look of the Caterpillar 769 dump truck made by Gescha/Conrad. He describes in detail the differences between the first pre-production models and the finally-released model ...

Albert Schmid describes a further piece of eye candy from his many display cabinets. This time he put the Dresser 4000 large wheeled loader in the spot light. The EMD model is made up from fine resin castings ...

Models

In the best of traditions, Volvo is updating models at the same time as they update the originals. The EC220E is completely new and the L350F has new safety features ...

As one of the few "large" producers, NZG is offering tool attachments for excavators separately. As well as the deep foundation tools set, the sectors of de-construction, load transfer and drag line excavators also have their own attachments ...

Current

Urs Peyer took a Caterpillar 631G Scraper head and gave it a massive new work assignment. It has been transformed into a water wagon used to keep dust down on dirt roads ...

On his urban civic engineering construction site diorama Markus Lindner, gives step-by-step instructions on how to model diaphragm wall segments. A very work-intensive procedure that is used not only to secure construction pit walls ...
