## Collecting

Despite the fact that Joal has produced many excellent models, acceptance of them has been rather cautious. The Carmix 3500 is an absolutely convincing model, even if a bit robust ...

Together with the Mercedes-Benz round hood LAK 1624, the new three-sided historical trailer from Conrad has been delivered. Fritze's Modellbörse offers the trailers in ten different colors ...

## Models

Historical cable-operated excavators have become more and more the sole prerogative of small manufacturers. GMTS has the necessary experience to produce one ...

The 16M is the second largest grader in the Caterpillar line-up. It is designed for the maintaining of mining tracks but despite this minor task, it reaches an impressive size and so does the model from CCM ...

## Current

Going "topless" is so yesterday; trucks with loads looks so much better! We show you where construction site material and goods can be found and how to load them correctly ...

Markus Lindner concentrates on the construction of diaphragm walls in this installment about his diorama. The construction of a Bentonite plant including storage silos is a challenge but not an insolvable one, as he demonstrates ...
