## Collecting

Walter Baertsch has been collecting models for the last forty years. He collected only what he likes, after giving up the idea of having a “gap-less” collection ...

Albert Schmid has taken another treasure out of his display cabinets and put it into the spot light. The Terex 33100B is a model from OHS. Constructed of brass and resin, it is worth a closer look ...

## Models

When collectors are waiting as impatiently as children do, it is generally because a special model is in the offing. That was the case with the P&H 4100XPC from TWH ...

Loaded on eight special heavy-duty transport tractor-trailer units, Herpa’s wind turbine is now on the road. The model that is over 1m tall when assembled, is spectacular. We put it under the magnifying glass ...

## Current

To make the long and dark winter evenings brighter, we recommend some DVD’s. We found some unique films for lovers of construction machines ...

Photographing a dragline excavator with a breathtaking mountain backdrop in Switzerland is possible only in the Canton of Wallis. Here we discovered a Liebherr HS 870 at work; for fans, this is almost a “genuine Menck” ...
